ARCHITECTING THE FUTURE OF LEARNING

www.pulisync.io

A MESSAGE FROM THE FOUNDER

With over two decades of leadership experience, I've seen first-hand how brilliant, dedicated people can be crushed by broken systems. Nowhere is that crisis more acute, or its consequences more profound, than in UK education.

The administrative burden placed upon our teachers is not an intractable problem; it is a systemic failure that we have the technology to solve, today.

I founded PuliSync because I refuse to accept this as the status quo. We are not just building another piece of software. We are engineering a new foundation for education—one that eliminates complexity, restores resources, and liberates our most valuable asset: the human potential of our teachers and children.

This is not just a commercial venture; it is a national mission.

Mbang
Rose Whittaker

Founder & Chief Executive Officer
PuliSync Ltd.

THE CRISIS

THE UK'S EDUCATION SYSTEM IS AT BREAKING POINT.

The evidence, much of it from the Department for Education's own research, is undeniable. A systemic failure in our digital infrastructure is fuelling a national crisis.

UK teachers work an average of **52.4 hours** per week, with over half of that time—a staggering **28.4 hours**—consumed by non-teaching, administrative tasks. This unsustainable workload is cited by **94%** of teachers as a key factor in their decision to leave the profession.

The root cause is a fragmented digital landscape, forcing schools to navigate between **8 and 36** disparate software systems. This digital chaos creates a direct, verifiable inefficiency cost of over **£150,000** per institution annually, resulting in a sector-wide drain of between **£1.9bn** and **£5.3bn** each year.

The UK's **£31 billion EdTech market** is Europe's largest, yet it lacks a foundational, sovereign operating system. This leaves our most critical social infrastructure reliant on a patchwork of disconnected solutions, hindering national data strategy and innovation

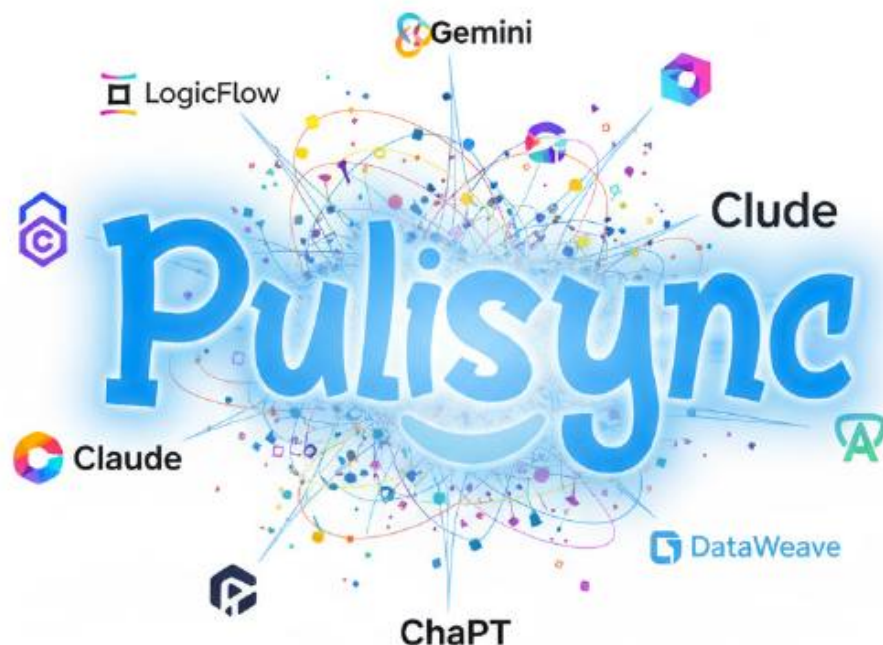

THE SOLUTION

OUR REVOLUTIONARY SOLUTION: THE UNIFIED INTELLIGENT ECOSYSTEM.

PuliSync is not another incremental improvement. It is the definitive answer to the crisis of fragmentation. We have engineered the **world's first truly unified educational ecosystem**—a single, intelligent platform that seamlessly integrates over 50 disparate systems, from student information and assessment to finance and HR.

At its heart is a proprietary **AI Orchestration** Layer, a sovereign AI engine that coordinates 157 specialised AI agents to deliver **99.9%** administrative automation.

Our platform is built on a **hyper-flexible**, adjustable, and scalable foundation, with enterprise-grade, quantum-resistant security and a commitment to UK data sovereignty, making it the secure, future-proof infrastructure our nation's schools deserve.

THE PULISYNC EFFECT

A TRANSFORMATIONAL RETURN ON INVESTMENT.

We deliver an immediate, measurable, and profound impact on every level of the educational institution.

25-30 HOURS

Weekly Administrative Time Returned to Every Teacher. We eliminate the 28.4 hours of non-teaching tasks, liberating educators to focus on their core mission: teaching.

£150,000+

Average Annual Savings Per Institution. We eradicate systemic inefficiencies, returning vital funds to the frontline of education.

300-500%

Return on Investment Within the First Year. Our platform is not a cost centre; it is a high-yield investment with a payback period of just a few months.

30%

Projected Increase in Student Outcomes. When teachers are empowered to teach, students thrive. This is the ultimate measure of our success.

THE VISION

OUR 30-YEAR VISION: THE QUANTUM-NEURAL EDUCATIONAL SINGULARITY FRAMEWORK.

Solving today's crisis is only the beginning. Our true vision is to architect the future of learning and establish an unassailable 30-year competitive advantage for the UK.

Our research confirms that the convergence of **quantum computing, neural interfaces, and blockchain** for education is a completely unexplored commercial and patent landscape.

PuliSync is the first to architect a platform for this inevitable future.

THE QUANTUM-NEURAL-BLOCKCHAIN TRINITY:

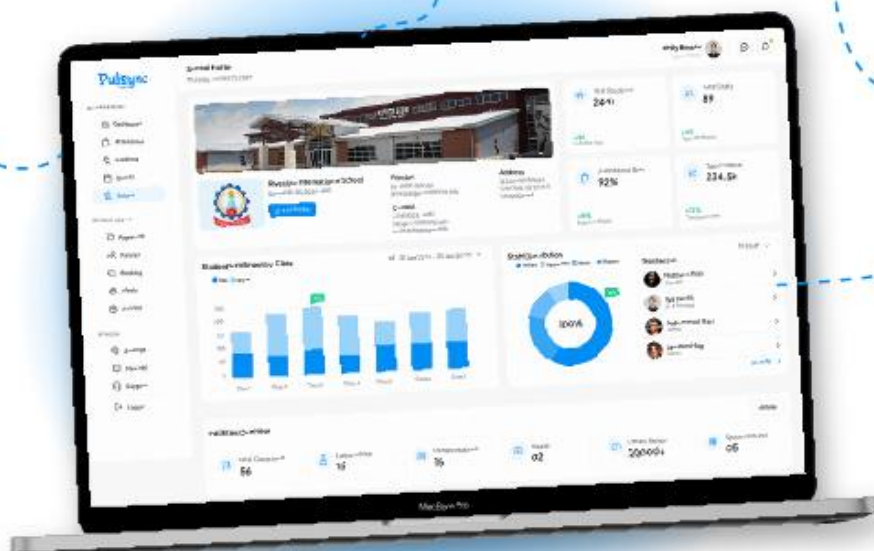

Unhackable personalisation and immortal, verifiable learning credentials.

DIRECT NEURAL KNOWLEDGE TRANSFER:

Radically accelerated skill acquisition within a framework that preserves cognitive liberty.

THE POST-AGI ECOSYSTEM:

A symbiotic learning network where human and artificial minds collaborate to solve humanity's greatest challenges.

THE LEADERSHIP

THE TEAM: VISIONARIES, ACADEMICS, AND BUILDERS.

A world-class leadership team fusing deep educational insight with cutting-edge technical execution.

MBANGO ROSE WHITTAKER

Founder & Chief Executive Officer

A strategist with over 20 years of leadership experience and an MBA, bringing a personal mission to solve complex systemic problems through technology.

DR. ANTHONY EZERIBE

Chief Learning Officer

A strategist with over 20 years of leadership experience and an MBA, bringing a personal mission to solve complex systemic problems through technology.

JORDAN CHESHAM

Chief Technology Officer

An expert with over 15 years of experience in the tech industry, specialising in scalable architecture and AI implementation, ensuring our vision is translated into robust, enterprise-grade technology.

MATTHEW ROBERTS

Strategic Advisor

As the CTO of the leading UK cloud architecture firm Binary Forge Solutions, Roberts provides invaluable independent guidance on building secure, nationally scalable infrastructure.

Pulisync

PARTNER WITH US TO ARCHITECT THE FUTURE.

PuliSync is seeking strategic partners—from government and education to investment and technology—to join us on our mission to solve today's educational crisis and build the infrastructure for tomorrow.
